

## Case Study

\*\*\*\*\*

### **Daniel Gordon – Level 2 Plumbing Apprenticeship, employed at Prowse & Son**

Bexley College offers a full range of Construction Apprenticeship courses that are taught at our Holly Hill Campus, dedicated solely to the construction trades.

Daniel Gordon first joined Bexley College three years ago, enrolling on a Level 1 Construction Multi Skills course and then progressing onto the Level 2 Heating & Ventilation course in order to further his skills and qualifications relevant to the plumbing trade. During this time Daniel showed immense promise so was naturally one of the candidates put forward for an apprentice vacancy with Welling based Heating & Ventilation company, Prowse & Son.

After a successful interview and trial Daniel received the great news that he had been successful in his application. Daniel said ***“When I found out that I had been successful in the apprenticeship, I was ecstatic, I am so grateful for the opportunity”***

As well as his apprenticeship at Prowse & Son, Daniel is still attending Bexley College, on the two year Level 2 Plumbing Apprenticeship. The course allows Daniel to study one day a week at the college and be assessed in his workplace. So what made Daniel choose Bexley College as his place of study? ***“Well I had friends who had gone to the college, who had positive things to say about their time there, so when I started looking for a construction course, I enquired at the College and they seemed to have everything I was looking for.”***

How is Daniel finding his course and his time at Bexley College? ***“It’s certainly been eventful and has had its ups and downs, but the College has helped me find my feet and have helped guide me in the right direction for my chosen career”***

On his employment at Prowse & Sons ***“It’s hard work but I am enjoying it and looking forward to the future opportunities”.***

Len Prowse at Prowse & Sons said of Daniel ***“He’s getting on very well. He’s a hard worker and is reliable”***

We at Bexley College wish Daniel all the success for the future.
